ARIZONA LOAN\$ for ASSISTIVE TECHNOLOGY

Providing Financial Loans for Assistive Technology

- Affordable
- Flexible
- Attainable

The Arizona Technology Access Program operates two financial loan programs:

AzLAT is an alternative financing program designed to assist individuals with disabilities to borrow money at affordable rates for the purchase of assistive technology.

S.E.E.D. Loan\$ is a similar program that targets persons with disabilities who are seeking employment through telework or self employment.

Qualified applicants (persons who can demonstrate ability to repay the loan) may be approved to borrow money in amounts ranging from \$500 to \$10,000. Pre-loan support services, flexible repayment terms, below market interest rates, and no prepayment penalties are features of these

**Independence is priceless;
we make it affordable**

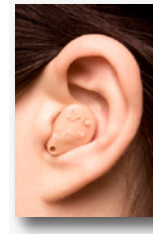

unique programs. They both offer consumer responsive services not often found through more traditional lenders:

- Assistance with completion of the loan application package
- Identification of other potential funding sources for assistive technology acquisition
- Guidance/recommendations for selection of assistive technology devices
- Assistance with identifying and locating vendors
- Guidance on resolving credit report errors
- Intervention options to avoid consumer default

Assistive Technology (AT) includes thousands of simple to complex devices and products that enable persons with disabilities to be more productive and independent in life activities such as communicating, self care tasks, home management, personal and community mobility that enhance employment, education, participation in recreation and independent living.

Assistive technology may be used at home, in the workplace, in the classroom, and in the community in ways that provide creative solutions to reduce barriers and increase personal capabilities.

Requirements

In order to be eligible for a loan, applicants (persons with disabilities or others on their behalf) must:

- Be current Arizona residents.
- Have the legal capacity and/or ability to enter into a contractual relationship for a loan.
- Demonstrate that the loan will be used to purchase assistive technology for a person with a disability.
- Demonstrate ability - through sufficient monthly income and credit worthiness - to repay the loans.
- Have an existing savings or checking account with a financial institution or be willing to open an account so that monthly loan payments can be automatically withdrawn in a direct debit from the account.

AzLAT is currently able to make loans in amounts ranging from \$500 to \$10,000.

AzLAT loans can be used to pay for a wide variety of assistive technology devices. The federal definition of assistive technology is as follows:

“Assistive technology is any item, piece of equipment or product system whether acquired commercially off the shelf, modified or customized that is used to increase or improve functional capacities of individuals with disabilities. Assistive technology services directly assist an individual with a disability in the selection, acquisition, or use of an assistive technology device.”
